EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

1. Claims 1, 4-11 and 13-34 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Applicant's invention is drawn to a system of reliably power a fiber optic communication network which reduces maintenance costs by providing a limited number of centralized remote power sources (i.e., an alarm system providing electrical communication to key points in the remote power source circuit for monitoring AC power source, the rectifiers voltage, the converter voltage and current limiters current, wherein the alarm system is operable to transmit operation information of the remote power source circuit over secure protocol, such as a TCP-IP and a RS-485 link, to a telecommunication service provider so that the telecommunication service provider is able to determine whether the remote power source circuit requires maintenance).

Applicant's independent claims 1 and 31 each recite, *inter alia*, a system for powering one or more devices in a fiber optic communication network, which transmits communication data between a telecommunications service provider and a remote user device with a structure as defined in the specification (pages 6-11) including an alarm system incorporation within the electrical power source, the alarm system being configured to monitor the operation of the electrical power source and to allow the telecommunication service provider to monitor an operation parameter of the power source by transmitting electrical power source operation information from the alarm system to the telecommunication service provider via the fiber optic

communication medium. Applicant's independent claims 1 and 31 comprise a particular combination of elements, which is neither taught nor suggested by the prior art.

Applicant's independent method claims 14 and 33 each recite, *inter alia*, providing an alarm system in the electrical power source, monitoring the operation of the electrical power source with the alarm system in the electrical power source, and the telecommunication service provider monitoring an operational parameter of the power source by transmitting electrical power source operation information from the alarm system to the telecommunication service provider via the fiber optic communication medium. These steps, in combination of the remaining steps, are neither taught nor suggested by the prior art.

Accordingly, Applicant's claims are allowed for these reasons and for the reasons recited by Applicant in Amendments filed 11/2/2000, 4/19/2001, 1/28/2002, 5/20/2002, 10/10/2002, 4/30/2003, 9/17/2003, 1/21/2004, 7/2/2004, 1/26/2005 and 9/19/2005.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
